

# Sources of information

**Nada Vukadinović**

<b>books</b>	<b>encyclopedias</b>
<b>journals/magazines</b>	<b>the Internet</b>
<b>conference proceedings</b>	<b>colleague students</b>
<b>diplomas</b>	<b>experts in the field /teachers</b>
<b>handbooks</b>	<b>catalogues</b>

## Where would you look for information for the following projects?

- **you need to present the various types of safety gloves**
- **you need to find a scheme of air circulation**
- **you need to make a historical review of mining methods**
- **you don't know what “greenhouse effect” is**
- **you need to report on wildfires in Slovenia**
- **you need to report on building of the Golovec tunnel**

## Defining key words

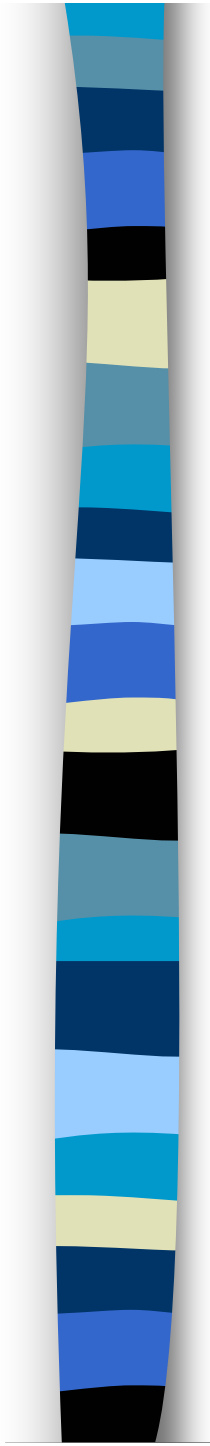

**"Target the wrong keywords and all your efforts will be in vain."**

## Defining key words

**Define the key words for the following problem:**

**Municipal solid waste is a big problem for all communities. There are mainly three options for solving this problem: (a) reducing the amount of waste generated, (b) disposing waste in landfills, (c) incinerating waste. Describe all the three methods and point out advantages and disadvantages of each.**

- 
- **Identify what you already know.**
  - **Identify what you don't know.**
  - **Think of the possible sources of information**
